Very elusive, bobcats seek cover in conifer stands and on rocky ledges, by blending in with their natural environment.

With its dramatically sloped roof supported by angled logs sitting on stone piers, the Bobcat by MossCreek is a high-style home that settles into any natural environment. Designed to accommodate a narrow lot, the Bobcat allows for expansive views from the open great room, kitchen, and dining area. An office, guest bath, and huge master bedroom suite with walk-in closet complete the main level. A loft, two bedrooms, and a unique storage area are all included in the upper level.

Upper Level
1,137 square feet

Main Level
1,664 square feet
