In 1869, the Atlantic and Pacific coasts of America were linked by continuous metal rails. The Transcontinental Railroad opened the American heartland to ambitious settlers eager to tame a new land.

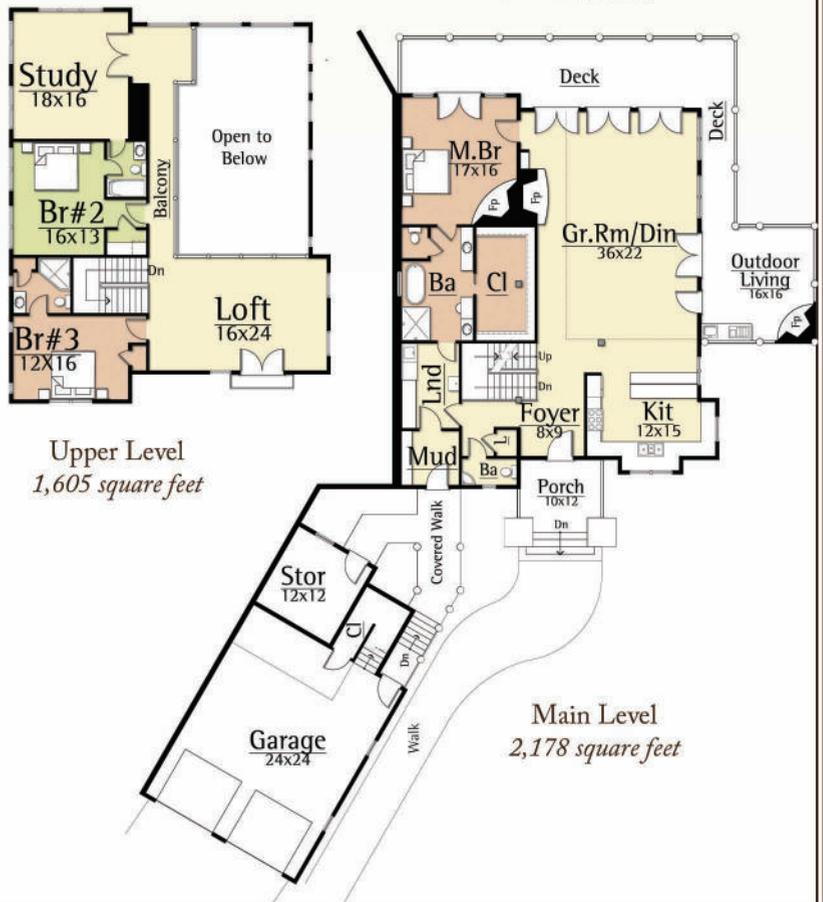

The Heartland by MossCreek embodies that same spirit of adventure. Designed as a hillside home, the Heartland nestles into its natural environment with ease.

The interior features three bedrooms and a study that can be used as a fourth bedroom. On the main level, the Great Room has a two story ceiling and a massive stone fireplace. The Master Bedroom suite also features a beautiful fireplace and large bath suite.

Beauty and ruggedness make the Heartland an ideal choice for rustic living.
