Longs Peak is one of the 53 mountains with summits over 14,000 feet in Colorado. As the only "fourteener" in Rocky Mountain National Park, the peak has long been of interest to climbers.

The Longs Peak by MossCreek shares the same spirit by reaching a high summit of rustic luxury. The exterior of Longs Peak features natural materials of wood, stone, timbers, and glass. The interior is designed with all the comforts of modern living. A soaring Great Room has a Loft above that looks down onto the massive fireplace below. An Outdoor Living Area with fireplace creates an ideal space for enjoying the outdoors and creating memories for a lifetime.
