

CEDAR

CONTEMPORARY LIVING

3,865 total square feet

4 Br, 3.5 Ba

The Cedar by MossCreek stands like a sentinel at the forest's edge, its modern lines a stark contrast to the wild nature around it.

Exterior stone, glass, and wood meld into a harmonious balance.

Inside, open living areas and a master suite with beamed ceilings exude warmth. The great room's vaulted ceiling captures light, casting an almost supernatural glow.

The lower level, with two spacious guest suites and an optional fourth bed/bunk room, promise comfort and rest.

The Cedar is more than a house; it is a living entity, whispering secrets and inviting you to stay.
